SUMMARY

I am passionate about developing intelligent solutions with expertise in Python, Django, Artificial Intelligence, and Machine Learning. I enjoy building web applications and working on data-driven projects that solve real-world problems. I am eager to keep learning, exploring new technologies, and enhancing my skills to grow as a professional developer.

Projects

AI Study Assistant:

Developed an AI-powered Study Assistant web application using Django and Python that summarizes notes and generates quizzes. Designed to enhance learning efficiency with a clean, user-friendly interface.

Sahulat Hub:

Built 'Sahulat Hub,' an on-demand service platform developed with React Native and Firebase. The app connects customers with service providers through real-time bidding, live location tracking, and chat.

Banking website:

Developed a secure Banking Website using the MERN stack with features like signup, login, money transfer, and withdrawal. Focused on providing a smooth user experience with modern UI and reliable backend integration.

Endless Runner Game:

Created an Endless Runner Game in Unity with realistic 3D environments and smooth gameplay mechanics. Implemented character movement, obstacles, and scoring system for an engaging player experience

Skills

Expertise

- Python
- Django (web framework)
- SQLite
- JavaScript
- HTML, CSS
- Artificial Intelligence
- Machine Learning
- OOP, DSA
- C++

Soft Skills

- Communication
- Teamwork
- Problem-Solving
- Adaptability
- Time Management
- Critical Thinking

Education

Matriculation in Science:

Govt High School Padhana (2016-18)

Intermediate:

Aspire Group of Colleges Manawa Campus (2018-20)

Bachelor's in Computer Science (BSCS):

Lahore Garrison University. (2021-25)
